surfaces without scratching them and,  
- an upper pad face (26) destined to be fixed to the bottom of said leg  
10 (28) of said piece of furniture, said flat body (30) being constituted of  
two pieces, a base (32) and a sole (34); said base comprising a fabric (38)  
with a superior face forming said upper pad face and an inferior face (36)  
comprising first means for assembly; said sole comprising a lower layer  
(46) whose inferior face defines said lower pad face (22), a central layer  
15 (48) comprising a reinforced material ~~(48)~~ and an upper layer (42) with a  
superior face (43) comprising second means for assembly to assemble said  
sole (34) to said base (32) along an interface plane, wherein said first  
means for assembly comprise a plurality of grabbing member hooks (36)  
each member hook providing a generally constant shear resistance in all  
20 directions substantially parallel to said interface plane, said reinforced  
material ~~(48)~~ in said central layer comprising a felt impregnated by a  
hardened material coming from a group comprising ~~an injected~~ a latex  
base.

8. (Original) The protector pad of claim 7 wherein said second means of  
25 assembly (42) comprise fibers forming arches (44).

9. (Previously presented) The protector pad of claim 8 wherein the  
material of said upper layer (42) of said sole (34) comprises a felt the
